

# EDGAR YAHIEL RICO GUZMAN

Software Engineering and Emerging Technologies Student | Full-Stack Development  
Tijuana, Mexico | +52 665-120-32-82 | yahiel.codes@gmail.com | [linkedin.com/in/edgar-rico-4107583a5](https://www.linkedin.com/in/edgar-rico-4107583a5)

## PROFESSIONAL SUMMARY

Final-year Software Engineering and Emerging Technologies student with a 90/100 GPA and hands-on experience building full-stack applications, automating test suites, and producing structured technical documentation. Comfortable across the software development lifecycle — from requirements and system design through implementation, testing, and delivery. Eager to contribute to a professional engineering team and grow through real-world challenges.

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, TypeScript, PHP, SQL, C

**Web & Backend:** Spring Boot, React, REST APIs, Spring Security, JWT, MySQL, PDO, MVC/MVVM

**Testing & Quality:** Functional testing, QA automation, Selenium WebDriver, TestNG, Maven, defect documentation

**Tools & Workflow:** Git, GitHub, IntelliJ IDEA, VS Code, XAMPP, Docker, GitHub Actions

**Cloud & Infrastructure:** AWS (Academy), Google Cloud (Coursera)

## PROJECTS

### CIMA — Inventory & Lab Equipment Loan Management System

Feb 2026 – Jun 2026

*Full-Stack Developer & Systems Analyst | Spring Boot · React · TypeScript · MySQL · JWT · REST APIs*

- Designed and built a role-based web system to manage laboratory inventory and equipment loans at UABC, replacing a manual paper-based process used across multiple departments.
- Implemented backend with Spring Boot, Spring Security, JWT authentication, and REST APIs; built a React/TypeScript frontend covering the full loan workflow — requests, queue management, returns, and incident reporting.
- Applied layered architecture (service, repository, DTO) and MVVM-style separation of concerns, resulting in a maintainable and extensible codebase.
- Produced full lifecycle documentation: FURPS+ requirements, use cases, UML diagrams (activity, sequence, class), prototypes, E-R model, and traceability matrix.

### CoffeeRank TJ — Local Café Discovery & Review Platform

Nov 2025 – Jun 2026

*Full-Stack Developer | PHP · JavaScript · MySQL · MVC · Leaflet.js*

- Built a full-stack MVC web platform featuring user authentication, searchable café catalog, interactive map integration (Leaflet.js), review system, and admin moderation panel.
- Implemented secure PDO prepared statements, session management, and REST-style data flow between client and server; designed a normalized relational database schema.

### SauceDemo QA Automation Suite

May 2026 – Jun 2026

*QA Automation | Java · Selenium WebDriver · TestNG · Maven*

- Built a Java-based automated test suite covering critical e-commerce workflows; designed a reusable Page Object Model structure with centralized test data and Maven Surefire reporting.
- Documented 32 functional test cases with traceability to expected outcomes and execution evidence; tracked and reported defects with detailed reproduction steps and supporting screenshots.

## ACADEMIC EXPERIENCE

### Teaching Assistant — OOP & Software Development Tools

Feb 2024 – Dec 2024

*Universidad Autónoma de Baja California | 2 Academic Terms | Tijuana, B.C., Mexico*

- Authored technical laboratory manuals and explained OOP concepts, programming tools, and structured development workflows to undergraduate students across two consecutive terms.
- Guided students in applying generative AI tools effectively within their software development workflow.

## Participant — NASA Space Apps Challenge 2025

Oct 2025

*International NASA Hackathon | Tijuana, B.C., Mexico*

- Collaborated with a cross-functional team to design and deliver a software solution within a 48-hour constraint, demonstrating problem-solving, adaptability, and team communication.

## EDUCATION

---

**Universidad Autónoma de Baja California (UABC)**

Tijuana, Baja California, Mexico

B.S. in and Emerging Technologies

2022 – Expected December 2026

**GPA: 90/100** | Relevant coursework: Data Structures, OOP, Software Quality, Databases, Systems Analysis

## CERTIFICATIONS & LANGUAGES

---

**AWS Academy Cloud Architecting** — Amazon Web Services

**Preparing for Google Cloud Certification: Cloud DevOps Engineer** — Coursera

**Languages:** Spanish (Native) | English (B2 – Upper Intermediate)
